

## Chapter 4 Non-college bound students

This Chapter is for parents who think they have a student who does not want to go to college. What Math should the student learn?

The good news is that all post-elementary students should start the same. With our program it is Tiers 1 and 2.

Then, if it is possible the student might want to go into the Military or into an Apprentice Program or a Tech School for some technical career path, we recommend additional topics we cover in our Workforce Math program.

We will soon be adding a Quantitative Reasoning Math Program that includes these special Workforce Topics and some other Finite Math topics as well.

We also will be adding a Consumer Math program which includes some of the topics we cover in Tier 3 and some others as well.

Visit [www.HomeShoolerToday.com](http://www.HomeShoolerToday.com) to see these programs when they are released.

But, the first thing you might want to do is enroll your student into our Family Plan and get started on Tiers 1 and 2. You can try it out for a month and if for any reason you don't like it just tell us and we will refund your money.

Remember it is delivered with SPIKE Pedagogy explained in Chapter 1.

Also, remember You will be the Coach and I will be the Teacher.

If you have access to a great Math Teacher and Coach who can deliver the Proper Content with SPIKE Technology, this is your best solution. Of course, it will probably cost a lot. No problem for a rich family.

However, if you are on a more frugal budget, then I highly recommend our Tier 1 and 2 program and supplementary Programs.

Probably the most cost effective way is the Family Plan. It is also totally Risk Free since you get to try it for 30 days and get your money back if for any reason you want to then cancel it.

If you do have a student who might take a very long time to complete the program then it would probably be more cost effective to purchase the Program ala-carte since it will now be available for the student for a very long time.

If you want to go this way visit [www.HomeShoolerToday.com](http://www.HomeShoolerToday.com) and Click on the Curriculum Tab for full details and the Pricing Tab to see all of your options.
